Winning Edge Maths Techniques: A Step by Step Guide to Answering Questions Within A Tenth of the Time Allowed

Book 1

- ✓ **A STEP BY STEP GUIDE TO ILLUSTRATE 'WINNING EDGE' TECHNIQUES AND TACTICS**
- ✓ **'POINTS TO REMEMBER' TO ELIMINATE CARELESS MISTAKES MADE BY STUDENTS.**

Timed Practice Questions

All questions are to be solved applying the “Winning Edge” Techniques illustrated in **WINNING EDGE MATHS TECHNIQUES Book 1**.

Q 1. PLIGHT OF THE SALARYMAN

In February, Dwight saved $\frac{1}{5}$ th of his monthly salary and spent one quarter of it on rent. He spent what he had left of his salary that month on food & clothing. In March, he had a promotion which gave him a pay rise of 25% of his February salary. In March he spent the same amount of money on rent but managed to increase the monthly amount he saved by 10%. As a result, he saved £300 in March.

How much did Dwight spend on food and clothing in February?

STEP3 _____

Answer: _____

*Cross reference: Question No. 13 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 22. WHAT IS THE WEIGHT OF SUGAR IN THE CAKE?

A cake mixer is having flour, sugar and butter in the ratio 7:5:3. The weight of the cake when baked is 10.5 grams. What is the weight of sugar in the baked cake?

Technique:

STEP1 _____

STEP2 _____

STEP3 _____

Answer: _____

*Cross reference: Question No. 15 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 23. WHAT IS THE VOLUME?

The total surface area of a cube is 54cm^2 . What is the volume of a cube?

Technique:

STEP1 _____

STEP2 _____

STEP3 _____

Answer: _____

*Cross reference: Question No. 22 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 24. WHAT IS a TO THE POWER q DIVIDED BY q?

If $a=9$ and $q=3$, what is $a^q \div q$?

Technique:

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No. 100 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 25. WHAT IS THE LOWEST NUMBER OF MEN AND COWS?

A farmer looks from a distance at a field containing only men and cows. She counts the number of legs seen as 20. What could be the lowest total number of men and cows in that field?

Technique:

STEP1 _____

STEP2 _____

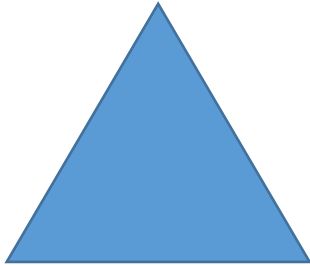

STEP3 _____

Answer: _____

*Cross reference: Question No. 3 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 26. HOW MANY TILES ARE NEEDED?

How many small equilateral triangle-shaped tiles are needed to tile the large equilateral triangle?

Length: 5 metres

Length: 100 cm

Technique:

STEP1 _____

STEP2 _____

STEP3 _____

STEP4 _____

Answer: _____

*Cross reference: Question No. 5 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 27. WHAT IS THE DIFFERENCE IN VOLUME?

Listed below are the dimensions of two containers.

Container 1 measures $11\text{cm} \times 7\text{cm} \times 6\text{cm}$

Container 2 measures $10\text{cm} \times 7\text{cm} \times 4\text{cm}$

Calculate the difference in volume between containers 1 and 2.

Technique:

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No. 23 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 28. WHAT IS THE AREA?

A piece of cardboard is 32.3cm wide and 54.2cm long.

What is the area in cm^2 of the cardboard?

- A) 1763.65cm^2 B) 1811.31cm^2 C) 1751.10cm^2 D) 1750.66cm^2

Technique:

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No. 24 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 29. HOW MANY DESTINATIONS?

The Eurasian airways fly to 47 destinations and all these destinations are either in Europe or Asia.

The Eurasian airways have 13 more destinations in Asia than in Europe.

How many destinations do they have in Europe?

Technique:

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No. 26 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 30. WHAT WAS THE PRICE OF THE LAPTOP?

Kiran bought a new laptop for £584 at a 20% off sale.

What was the original price of the laptop?

Technique:

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No. 28 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 31. HOW MANY WEEKS IT WILL TAKE?

John receives £3.75 weekly as pocket money.

How many weeks does John have to collect his pocket money in order to purchase a camera for £149.99?

Technique:

STEP1 _____

STEP2 _____

STEP3 _____

Answer: _____

*Cross reference: Question No. 29 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 32. WHAT TIME WILL THE WATCH SHOW?

Jane's watch loses 20 seconds every half hour. If she sets the correct time at 9am, what time will her watch show at 7pm on the same day?

Technique:

STEP1 _____

STEP2 _____

STEP3 _____

Answer: _____

Q 33. CURRENCY EXCHANGE

Ichiro wanted to change 43750 Japanese Yen to British Pound Sterling at the local money changer where he saw the following on the electronic display:

1 Japanese Yen = 0.008 Euros

1 British Pound Sterling = 1.4 Euros

How many pounds did Ichiro receive?

Technique:

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No. 40 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 34. FIND THE DEGREES?

A class of 27 students were asked to vote for their favourite teacher. The results were as follows:

Mr. Nigate: 6 Mrs. French: 12 Ms. Agarkar: 3 Mr. Ferdinand : 6

The Head teacher wants to make a pie chart from these results, but first asks one of the students to make a table, expressing each teacher voted for as a number of degrees on the pie chart.

Make the table for all the types of teachers in degrees (°)

Technique:

STEP1 _____

STEP2 _____

STEP3 _____

Answer: _____

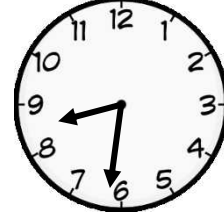

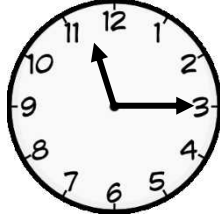

*Cross reference: Question No. 37 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 35. HANDS OF A CLOCK

Find the smaller angle between the hour and minute hands of the clock when the time is:

i) 11:15 pm

ii) 8:32 am

Technique:

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No. 10 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 36. WHAT IS THE TOTAL LENGTH THE WORM TRAVELLED?

When a worm climbs 4cm, it slips 1cm.

If a worm has reached a height of 33cm above the ground, what is the total length it has travelled from the ground (including its slips) to reach 33cm?

Technique:

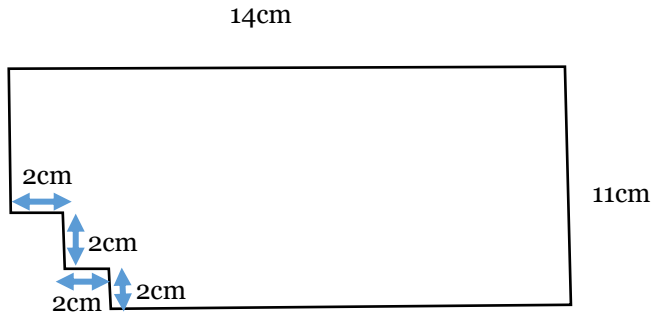

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No. 43 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 37. WHAT IS THE PERIMETER?

What is the perimeter of the above shape?

Technique:

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No.56 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 38. WHAT IS THE WIDTH?

Two boxes have the same volume. The dimensions of one of the boxes is 7cm by 9cm by 6cm. The other box has a length of 4.5cm and a height of 12cm. What is the width of the second box?

Technique:

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No. 58 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 39. HOW MANY MATCHES?

PQR F.C. won 70% of their matches last year.

PQR F.C. also lost 6 matches and tied 3 matches in the same year.

How many matches did PQR F.C. play last year?

Technique:

STEP1 _____

STEP2 _____

Answer: _____

*Cross reference: Question No. 99 in **WINNING EDGE MATHS TECHNIQUES** Book 1.*

Q 40. HOW MANY GAMES?

There are six teams (A, B, C, D, E, F) competing in a round robin tournament, with each team playing every other team once.

If there are no further games after the round robin, how many total games are played in the tournament?

Technique:

STEP1 _____

Q 73. GAMESTATION

GameStore and Games-Are-Us are competitors. Ramona visited both stores and fell in love with the new GameStation that was available in both of them.

Even though both stores offered a generous discount of 40% off their price, Ramona found that if she buys the GameStation from Games-Are-Us, she would pay \$18 less than the discounted price at GameStore.

If the original price of that GameStation at Games-Are-Us is \$450, what is the overall percentage discount from their original price GameStore should offer match the discounted price of Games-Are-Us?

Q 81. NEW-AGE WEIGHING

Three friends consulted a dietician together. They told the dietician that none of them wanted to disclose their individual mass to each other. The dietician abided to this request, but did so in an unusual manner, weighing 2 of them at a time. All 3 possible combinations of the friends were weighed.

The results are as follows:

$$147\text{kg} \quad / \quad 141\text{kg} \quad / \quad 138\text{kg}$$

What is the combined mass of the lightest person and the second heaviest person?
